

## MODERN PUMP TECHNOLOGY FOR THE NEW FUNKE MEDIENGRUPPE HEADQUARTER

REFERENCE: **ESSEN | GERMANY**

The complete pump technology in the new company headquarters of the FUNKE MEDIENGRUPPE works with HOMA pumps and lifting units.

Pumping medium:

**Sewage, wastewater and rainwater**

Built-in components:

**7 x double units TP 30 / HCON**

**2 x double units VX 1345-46 ET 54 EX / HSK**

**3 x double units MXS 2332- 52 ET 74/PU 92 EX**

**4 x PE 40/80 MX 2444 /46 / HSK**

**10 x Sanistar / Sanistar Plus**

**2 x SaniQ Plus**

business field:

**Drainage domestic waste water disposal**

### PROJECT DESCRIPTION

FUNKE MEDIENGRUPPE build the corporate headquarters at their corporate home base in Essen, Germany. The project has a gross floor area of 37,000 sq. m. A longitudinal volume provides the backbone of the urban development site. Three annexes extending from it point like fingers to the outdoor spaces of the adjacent residential estates. The endpoint of the urban design ensemble is the Funke Media Tower.

The complete pump technology in the building works with HOMA pumps and lifting units. In cooperation with DL-Anlagentechnik, these were installed and connected. One challenge was that the next channel could not be used. The wastewater transport now runs over another route to the suitable sewer.
